BANK INDONESIA

CONSUMER SURVEY

OCTOBER 2026 CONSUMER CONFIDENCE INCREASING

Consumer Confidence	The latest Consumer Survey conducted by Bank Indonesia in October 2026 indicates stronger consumer confidence in economic conditions compared with September 2026. This was reflected by an optimistic (index >100) Consumer Confidence Index (CCI) of 119.9 in October 2026, up from 118.1 in September 2026.
Current & Expected Economic Condition	Stronger consumer confidence in October 2026 was supported by respective increases in the Current Economic Condition Index (CECI) and Consumer Expectation Index (CEI) to 109.1 and 130.7 from 107.5 and 128.7 in September 2026.

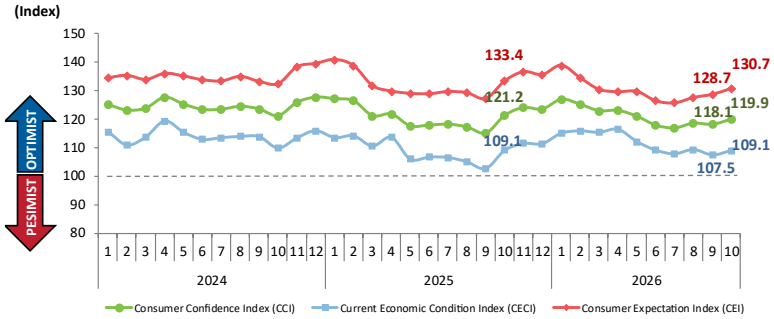

A. Consumer Confidence

A.1. Consumer Confidence Index (CCI)

Consumer confidence increased in October 2026.

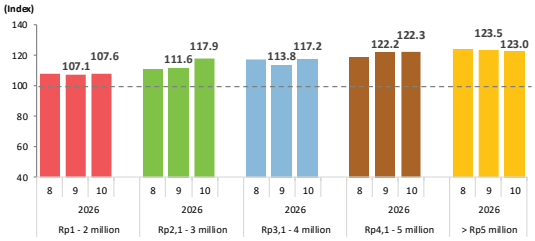

According to the latest Consumer Survey conducted by Bank Indonesia in October 2026, consumer confidence in economic conditions increased. This was reflected by an optimistic Consumer Confidence Index (CCI) of 119.9 in October 2026, up from 118.1 in the previous period. Optimism was bolstered by improving consumer perception of current economic conditions and expectations of future economic conditions. Accordingly, the Current Economic Condition Index (CECI) and Consumer Expectation Index (CEI) were recorded at 109.1 and 130.7, respectively (Graph 1).

Graph 1 Consumer Confidence Index

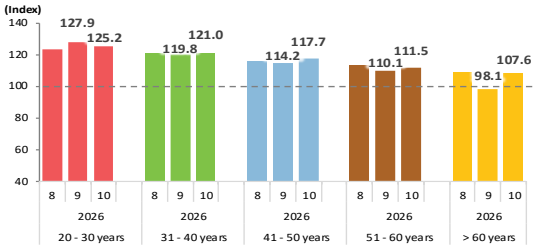

Based on spending, consumer confidence increased across almost all spending brackets in October 2026, with the highest CCI reading of 123.0 recorded by respondents spending more than Rp5 million per month (Graph 2). Based on age, the highest CCI was reported by respondents in the 20-30 age group at 125.2 (Graph 3). Regionally, the largest CCI gains were observed in Makassar, Bandung and Banten.

Graph 2 CCI by Spending Level

Graph 3 CCI by Respondents' Age

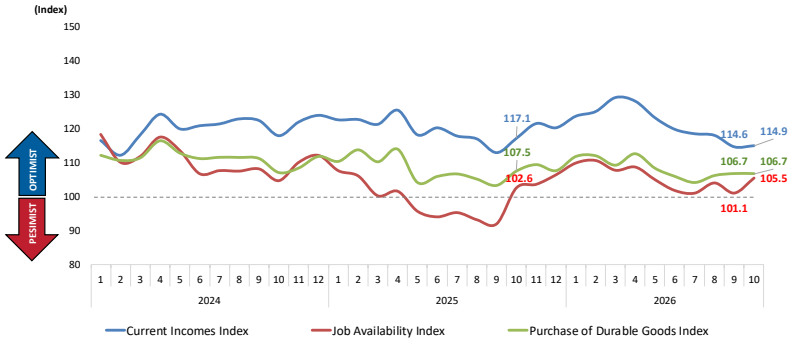

A.2. Current Economic Condition Index (CECI)

Consumer perception of current economic conditions improved.

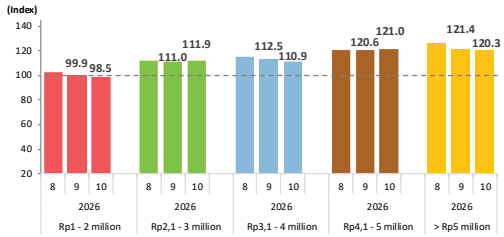

Consumer perception of current economic conditions improved, as reflected by a CECI of 109.1 in October 2026, thus remaining in an optimistic phase (index >100), up from 107.5 in the previous period. The increase in the CECI stemmed from higher Current Income Index and Job Availability Index readings of 114.9 and 105.5, respectively, compared with 114.6 and 101.1 the month earlier. Meanwhile, the Purchase of Durable Goods Index was recorded at 106.7, relatively stable compared with the previous month (Graph 4). Regionally, the largest CECI increases were observed in Makassar, Bandung and Banten.

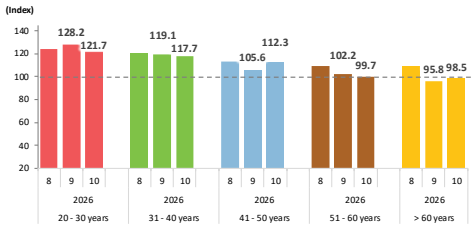

Graph 4 Current Economic Condition Index by Components

Based on spending, consumer confidence concerning current income remained solid in most spending brackets, except respondents spending Rp1-2 million per month, where the index was recorded in pessimistic territory. The highest index was reported by respondents spending Rp4.1-5 million per month at 121.0 (Graph 5). Based on age, the highest index was confirmed by respondents in the 20-30 age group at 121.7 (Graph 6).

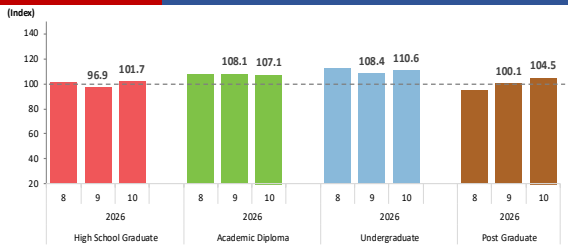

Graph 5	Income Index by Spending Level	Graph 6	Income Index by Respondents' Age

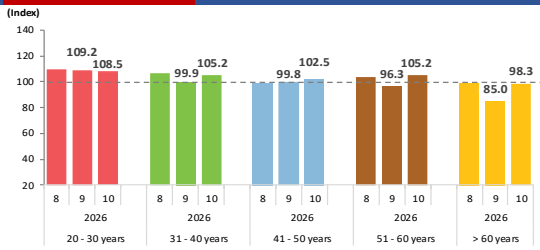

Based on educational background, respondent perception of current job availability improved across almost all educational backgrounds. The highest index was recorded among undergraduates, increasing to 110.6 (Graph 7). Based on age, the Job Availability Index was recorded in optimistic territory among respondents in the 20-60 age groups (Graph 8).

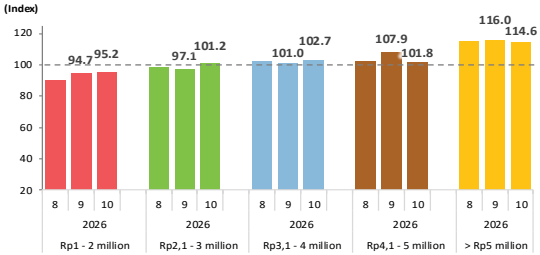

Graph 7	Job Availability Index by Respondents' Educational Background	Graph 8	Job Availability Index by Respondents' Age

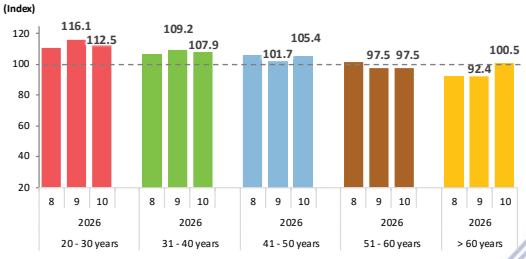

Based on spending, the Purchase of Durable Goods Index was observed in optimistic territory among respondents spending more than Rp2.1 million per month. The highest index was recorded by respondents spending more than Rp5 million per month at 114.6 (Graph 9). Based on age, the highest index was recorded by respondents in the 20-30 age group, followed by the 31-40 age group, at 112.5 and 107.9, respectively (Graph 10).

Graph 9	Purchase of Durable Goods Index by Spending Level	Graph 10	Purchase of Durable Goods Index by Respondents' Age

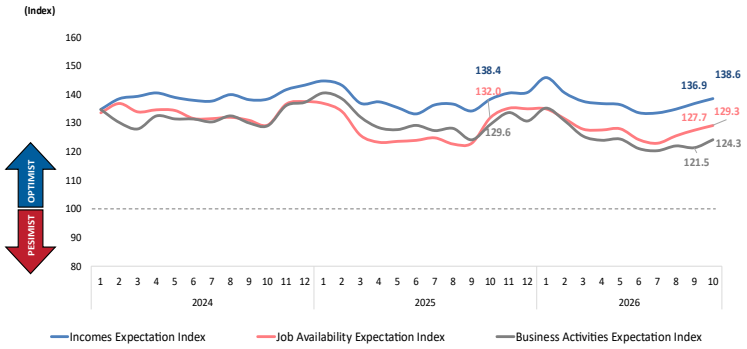

A.3. Consumer Expectation Index (CEI)

Consumer expectations of future economic conditions increased.

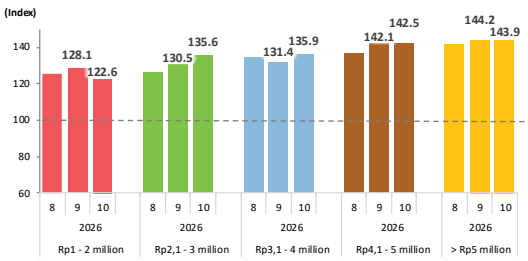

Consumers expect economic conditions in the next six months to improve. This was reflected by a CEI of 130.7 in October 2026, up from 128.7 in the previous period. The increase in the CEI stemmed from broad gains across all components, namely the Income Expectation Index, Job Availability Expectation Index and Business Activity Expectation Index, which were recorded at 138.6, 129.3 and 124.3, respectively, up from 136.9, 127.7 and 121.5 in the previous period (Graph 11). Regionally, the largest CEI increases were reported by respondents in Makassar, Bandung and Banten.

Graph 11 Consumer Expectation Index by Components

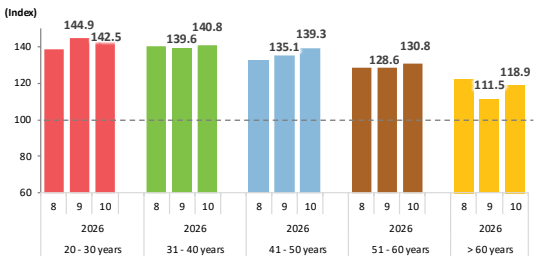

Respondent expectations of income in the next six months were optimistic across all spending brackets. Higher index readings were reported by respondents spending Rp2.1-5 million per month (Graph 12). Based on age, the highest index was recorded by respondents in the 20-30 age group, followed by the 31-40 age group, at 142.5 and 140.8, respectively (Graph 13).

Graph 12 Income Expectation Index by Spending Level

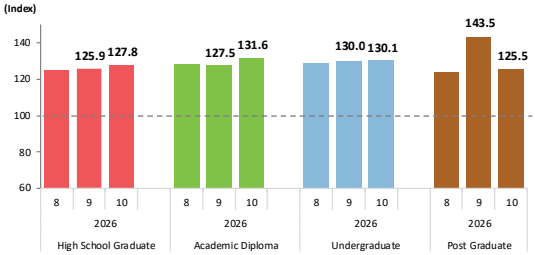

Graph 13 Income Expectation Index by Respondents' Age

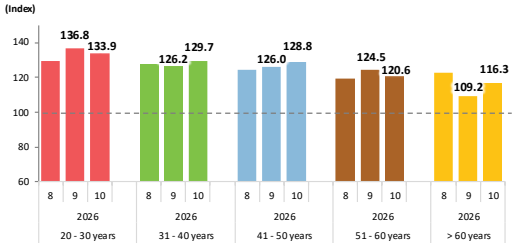

Consumer expectations of job availability in the next six months occupied optimistic territory across all educational backgrounds. The highest index was recorded by respondents with an academic diploma as well as undergraduates at 131.6 and 130.1 (Graph 14). Based on age, index readings increased across most age groups, with the highest index recorded among respondents in the 20-30 age group, followed by the 31-40 age group, at 133.9 and 129.7, respectively (Graph 15).

Graph 14 Job Availability Expectation Index by Respondents' Educational Background

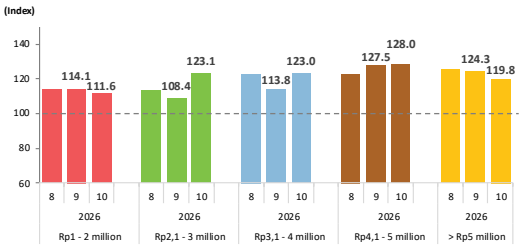

Graph 15 Job Availability Expectation Index by Respondents' Age

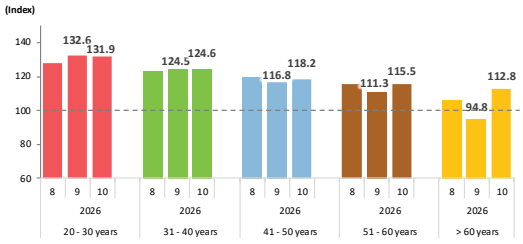

Consumer expectations of future business activity were optimistic across all spending brackets. Higher index readings were reported by respondents spending Rp2.1-5 million per month (Graph 16). Based on age, index readings increased among respondents aged over 31, while the 20-30 age group recorded a decline (Graph 17).

Graph 16 Business Activity Expectation Index by Spending Level

Graph 17 Business Activity Expectation Index by Respondents' Age

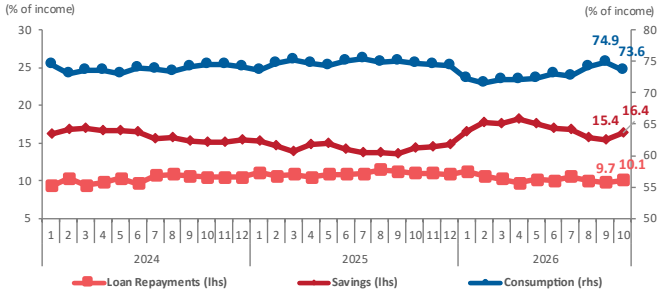

B. Consumer Financial Conditions

The average propensity to consume ratio declined amid relatively stable debt instalment repayments and an increasing savings ratio.

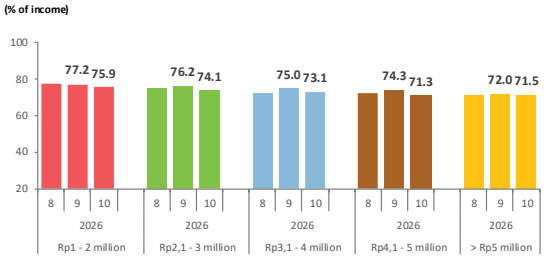

In October 2026, the average propensity to consume ratio was recorded at 73.6%, down from 74.9% in the previous period. Meanwhile, the debt instalment-to-income ratio was recorded at 10.1%, relatively stable compared with 9.7% the month earlier. Furthermore, the savings-to-income ratio increased to 16.4% from 15.4% in the previous month (Graph 18).

Graph 18 Distribution of Household Income Allocation

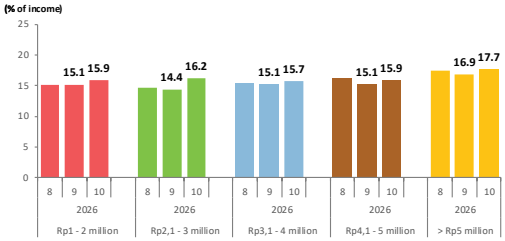

The average propensity to consume ratio experienced broad-based declines across all spending brackets (Graph 19). Conversely, the savings-to-income ratio increased across all spending brackets (Graph 20).

Graph 19 Household Consumption Allocation by Spending Level

Graph 20 Household Saving by Spending Level

METHODOLOGY

The Consumer Survey has been conducted monthly since October 1999. Moreover, since January 2007, the survey has involved 4,600 households (stratified random sampling) in 18 cities, namely Jakarta, Bandung, Bodebek, Semarang, Surabaya, Medan, Makassar, Bandar Lampung, Palembang, Banjarmasin, Padang, Pontianak, Samarinda, Manado, Denpasar, Mataram, Pangkal Pinang, Ambon and Banten. The index per city is calculated using the balanced score method (net balance + 100) which indicates that a score of above 100 is considered optimistic and index of below 100 is pessimistic.
