

RESIDENTIAL PROPERTY PRICE SURVEY FOR PRIMARY HOUSE

Quarter IV-2023

Residential Property Prices Increasing

Price Index

The results of the latest Residential Property Price Survey conducted by Bank Indonesia in the fourth quarter of 2024 indicates that residential property prices in the primary market are rising, yet not as quickly as in the previous period. Growth of the Residential Property Price Index (RPPI) moderated to 1.74% (yoy) in the fourth quarter of 2023 from 1.96% (yoy) in the third quarter of 2023.

Sales

The latest survey also reveals a quite significant rebound of residential property sales in the fourth quarter of 2023, as reflected by 3.27% (yoy) growth in the reporting period after contracting 6.59% (yoy) in the third quarter of 2023.

Financing

Based on the sources of finance, the latest Residential Property Price Survey also shows that most developers continued to rely on non-bank financing in the form of internal funds for residential property development, dominating 72.82% of total capital in the fourth quarter of 2023. On the consumer side, housing loans disbursed by the banking industry remained the preferred source of financing residential property purchases, accounting for 75.89% of total financing in the reporting period.

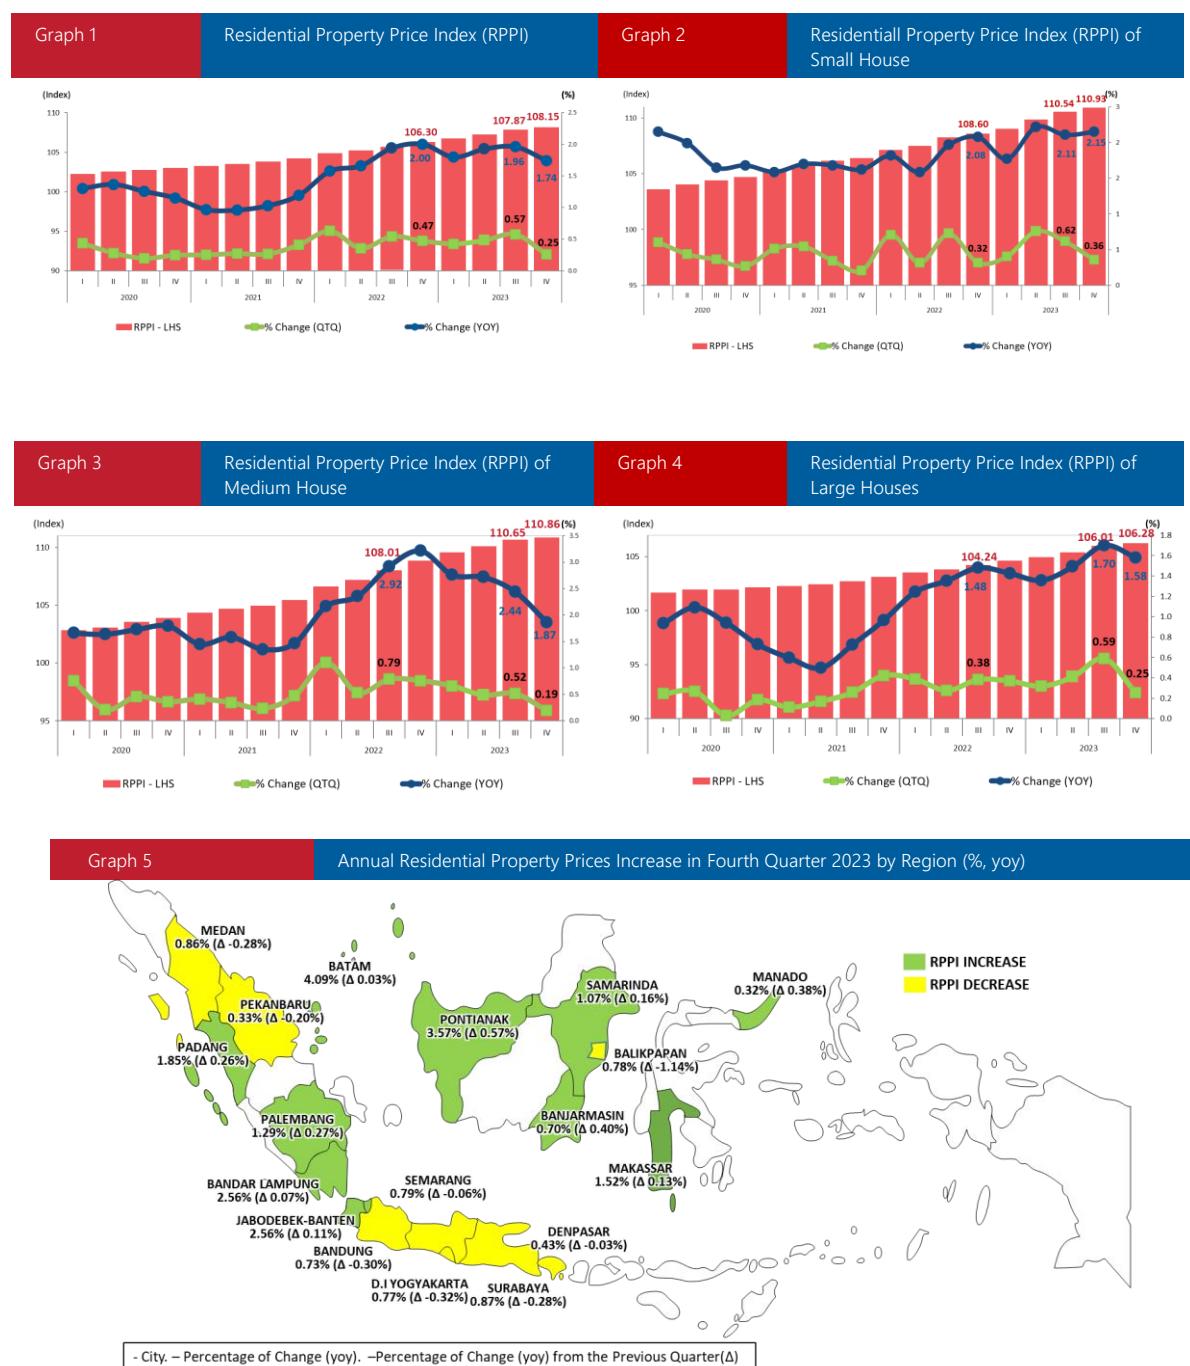

Residential Property Prices in the Fourth Quarter of 2023

The residential property price index (RPPI) increased in the fourth quarter of 2023.

The latest Residential Property Price Survey conducted by Bank Indonesia in the fourth quarter of 2023 indicates that residential property prices in the primary market increased in the reporting period, as reflected by 1.74% ¹(yoy) growth in the Residential Property Price Index (RPPI), down from 1.96% (yoy) in the third quarter of 2023 (Graph 1). Respondents confirmed that stronger 2.15% (yoy) growth in the prices of small residential properties, up from 2.11% (yoy) in the third quarter of 2023, was the main driver of the recent RPPI gains (Graph 2). Further improvements were offset, however, by moderating growth in the price of medium residences from 2.44% (yoy) in the third quarter of 2023 to 1.87% (yoy) in the reporting period (Graph 3), as well as large houses from 1.58% (yoy) to 1.70% (yoy) (Graph 4). Regionally, of the 18 surveyed cities, respondents in 10 cities reported a higher RPPI in the fourth quarter of 2023, with the remaining eight cities experiencing moderation. Higher residential property prices in the fourth quarter of 2023 were primarily observed in the cities of Pontianak (3.57% yoy), Banjarmasin (0.70% yoy) and Manado (0.32% yoy), with moderation confirmed in Balikpapan (0.78% yoy), Yogyakarta (0.77% yoy) and Bandung (0.73% yoy) (Graph 5).

¹ Figures are produced using the new methodology, which is detailed further in the methodology box

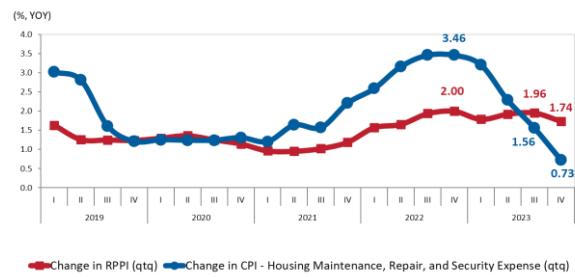

On a quarterly basis, residential property prices in the primary market increased slightly by 0.25% (qtq) in the fourth quarter of 2023, decelerating from 0.48% (qtq) in the previous period (Graph 1). Slower rising prices of all residential property types in the fourth quarter of 2023 were the main contributors, with growth of small, medium and large houses decelerating to 0.36% (qtq), 0.17% (qtq) and 0.25% (qtq) respectively from 0.62% (qtq), 0.52% (qtq) and 0.25% (qtq) (Graphs 2, 3 & 4). Regionally, limited RPPI gains were primarily reported by respondents in Pontianak (0.71% qtq), Padang (0.39% qtq) and Surabaya (-0.13% qtq) (Table 3).

Residential property price developments in the fourth quarter of 2023 were in line with milder CPI inflationary pressures on building materials, as reflected by lower annual inflation of the maintenance, repair and security cost component of the Consumer Confidence Index (CCI) in December 2023 to 0.73% (yoY) from 1.56% (yoY) in the third quarter of 2023 (Graph 6).

Graph 6

RPPI and the Housing Maintenance, Repair, and Security Expenses Component of CPI (% ,yoY)

Residential Property Sales in the Fourth Quarter of 2023

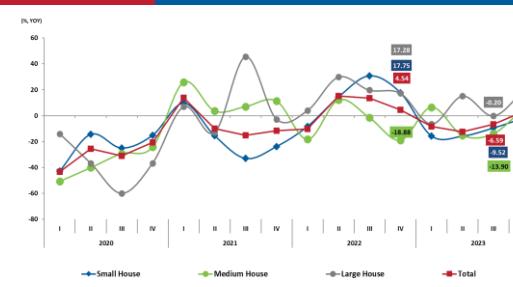

Residential property sales experienced a quite significant increase in the fourth quarter of 2023.

Annual residential property sales in the primary market experienced a quite significant increase in the fourth quarter of 2023. Residential property sales in the fourth quarter of 2023 improved to increase 3.37% (yoY) after contracting 6.59% (yoY) in the previous period. This was driven by higher sales of all residential property types in the fourth quarter of 2023, particularly medium (6.29% yoY) and large (19.93% mtm) residences. On the other hand, sales of small houses improved but remained in contractionary territory, declining 1.60% (yoY) in the reporting period (Graph 7). Respondents cited several factors constraining residential property sales in the primary market in the fourth quarter of 2023, namely: (i) licensing/bureaucracy issues (33.62%), (ii) lending rates on housing loans (28.07%), (iii) large down payment requirements on housing loan applications (22.83%), and (iv) tax issues (15.47%) (Graph 9).

Higher annual residential property sales in the primary market were primarily underpinned by solid quarterly sales performance in the reporting period, as reflected by 2.12% (qtq) growth in the fourth quarter of 2023, despite moderating from 6.74% (qtq) in the previous period. Strong quarterly residential property sales performance was primarily supported by small (3.81% qtq) and large (1.22% qtq) residences, contrasting the 0.62% (qtq) sales contraction recorded in terms of medium houses (Graph 8).

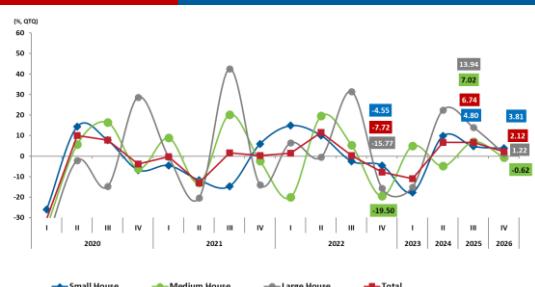

Graph 7

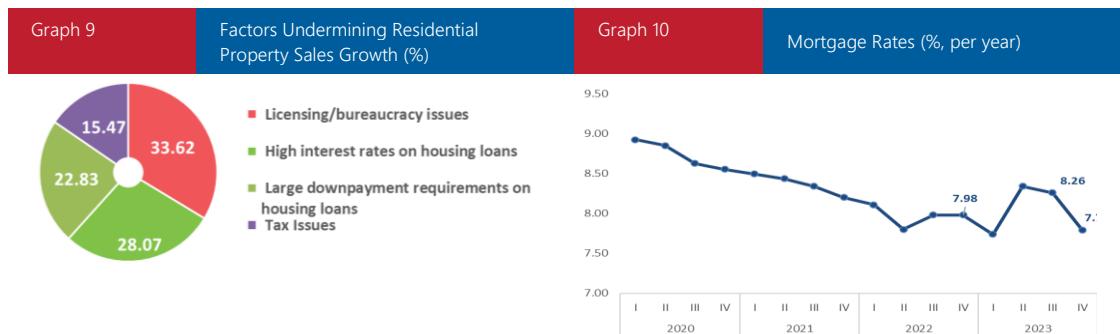

Property Sales Growth (% ,yoY)

Graph 8

Property Sales Quarterly Growth (% ,qtq)

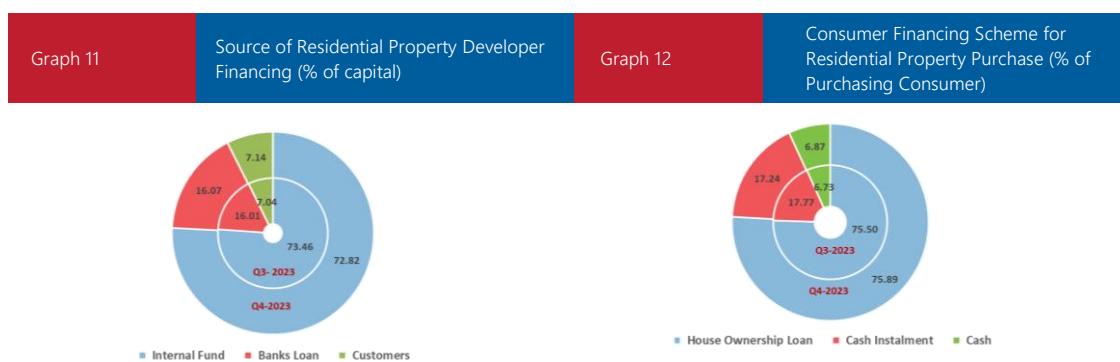

Residential Property Financing

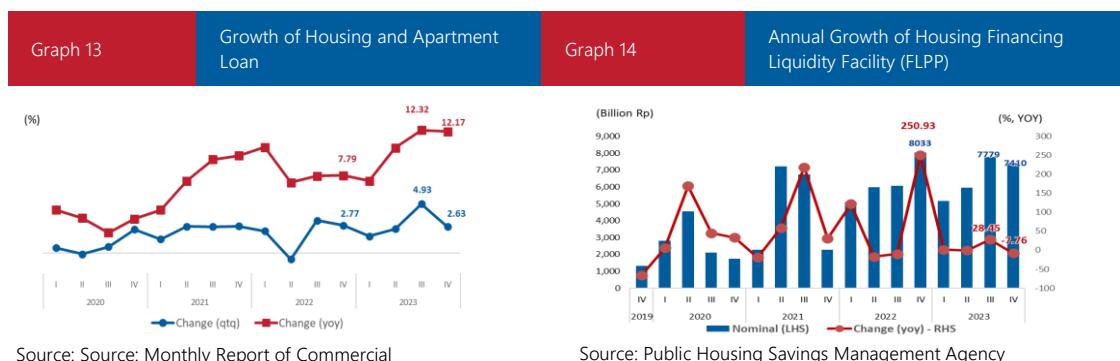

Property developers continued to rely on internal funds, while most consumers favoured housing loans.

In the fourth quarter of 2023, property developers continued to rely on non-bank financing as the primary source for residential property development, with internal funds accounting for 72.82% of total capital, followed by bank loans (16.07%) and consumer payments (7.14%) (Graph 11).

On the consumer side, housing loans remained the preferred form of financing for residential property purchases, dominating 75.89% of the total, followed by cash instalments (17.24%) and cash (6.87%) (Graph 12).

Annually, the total value of housing and apartment loans disbursed by the banking industry increased 12.17% (yoY) in the fourth quarter of 2023, which was relatively stable compared with 12.32% (yoY) growth in the previous period. Stable annual growth was supported by an upward quarterly trend, with growth of housing and apartment loans decelerating from 4.93% (qtq) to 2.63% (qtq) in the reporting period (Graph 13). Totalling Rp7,410 trillion, Housing Financing Liquidity Facility (FLPP²) disbursements in the fourth quarter of 2023 contracted 7.76% (yoY) (Graph 14).

METHODOLOGY

The Residential Property Price Survey is conducted on a quarterly basis with a sample of major developers in 16 cities, namely Jabodebek and Banten, Bandung, Surabaya, Semarang, Yogyakarta, Manado, Makassar, Denpasar, Pontianak, Banjarmasin, Bandar Lampung, Palembang, Padang, Medan, Batam, and Balikpapan. In the first quarter 2018 survey, there were an additional 2 cities namely Pekanbaru and Samarinda, bringing the total cities surveyed to 18 cities. Data collection is conducted face to face covering residential sale price, residential unit built and sold in the corresponding quarter, as well as expected residential sale price in the following quarter. Since the first quarter of 2018, the method of calculating residential property sales was changed from accumulated sales to sales during the quarter under survey. Furthermore, the base year was changed from 2002 = 100 to 2018 = 100 in quarter III-2022. In addition, there is an adjustment to the weight calculation method where the weight calculation is based on the value of the mortgage collateral at the bank.
