

G20 SIDE EVENTS ※☆
3rd FMCBG & 3rd FCBD

July 11-17, 2022 Bali

PERRY WARJIYO

SRI MULYANI INDRAWATI

Governor of Bank Indonesia

Minister of Finance of Indonesia

On behalf of the Indonesian G20 Presidency 2022, we would like to welcome you to Bali, where we will deliberate once more on how to bring the world to recover together and recover stronger, from the pandemic and from new contemporary economic challenges. This year, the G20 finance track adopts six priorities: exit strategies to support recovery, addressing scarring effect to secure future growth, payment system in digital era, sustainable finance, financial digital inclusion, international taxation. We strongly believe that only with close policy coordination and collaboration, the global economy can exit from the health crisis and its economic fallout, and afterwards recover with high quality and for long term.

Parallel with the formal meetings of Finance and Central Bank Deputies (FCBD) and Finance Ministers and Central Bank Governors (FMCBG), the G20 Presidency will conduct a series of side events from July 11th to July 17th, 2022. The side events will take the form of seminar, workshop and showcase, as collaboration efforts between policy makers and industry players. Yes, we are bringing policy makers and industry players closer to each other so that they are encouraged to work together and progressively. Such partnership is key to overcome the challenges during the Covid-19 period and now is transferring its energy to the rest of the G20 members and beyond. The side events also serve as windows for the public to access various priority agendas discussed behind the close doors of the G20 main meetings.

There are four flagships in the side events. The first is policy normalization and its impact to the economy. The subthemes includes exit strategy, scarring effect, policy mix, and infrastructure. Here we will be discussing how policy

normalization brings new challenges to the global economy, and how we are able to deal with them by employing the right dose of policy mix. The second flagship is advancing digital economy and finance: synergistic and inclusive ecosystem for accelerated recovery. There will be five consecutive days of digital economic festival (July 11th to July 15th) participated by banks and other financial institutions. Recent trends in digital finance will be discussed, including cross-border payments, crypto-assets and CBDC. The third flagship is on green-related issues, which serves as an umbrella for green, inclusion and Sharia financing. This year priority in the digital financial inclusion for women, youth and SMEs will be deliberated. For jurisdiction with geographical challenges such as Indonesia, financial inclusion will stay as top priority.Last but not least, the fourth flagship international taxation talking on how a number of initiatives has been reforming the international tax code.

All events are open for all FCBD and FMCBG delegates, central bankers, government officials, as well as business and academia, aiming to bring the G20 global premier atmosphere into a broader audience. With this note, both of us are inviting all the delegates to visit every unique side event. The side events will take place in Bali International Convention Center and Bali Nusa Dua Convention Center in Nusa Dua, a primary resort area in Bali with excellent tourism infrastructure.

Therefore, we wish you all very productive meetings, enjoyable side events, and becoming part of Bali, the Island of God...

Perry Warjiyo Governor of Bank Indonesia

Digital Finance to Support Financial Inclusion

 $\approx \diamond$ 17 July 2022

Gala Seminar

3rd G20 FMCBG & FCBD Side Events at a Glance

The momentum of global economic recovery has weakened. After more than two years of COVID-19, countries have undertaken extraordinary measures to spur recovery. But the pandemic is not over yet. The combined health and economic shocks persist in a geopolitically unsettled world. From high inflationary pressures to inequality to climate change, these turbulent global contexts demand greater global cooperation more than ever. As countries work to navigate the multifaceted challenges, the megatrend of green economy and digitalization has also demonstrated its potential as a global engine toward a strong, sustainable, balanced, and inclusive recovery.

Against this backdrop, the G20 under Indonesian Presidency holds a strategic role as a premier forum for global economic cooperation in transforming ideas into dialogues, dialogues into policies, and policies into impact. The 3rd FMCBG and FCBD under the G20 Indonesian Presidency is an excellent opportunity to convene global stakeholders across government, industries, academia, micro-small medium enterprises (MSMEs), and the rest of civil society. From the debate of prominent macroeconomic policymaker who decides fiscal and monetary policy response to the showcase of MSMEs' product that drives job creation and local innovation, this full-week event will present a strong building block toward key priorities under the G20 Indonesian Presidency to Recover Together, Recover Stronger.

The event consists of four flagship themes over a week, focused on stimulating insights, dialogues, and collaborations to pave the way for stronger multilateralism and concrete actions toward the deliberation of the 3rd G20 Finance Ministers and Central Bank Governors.

1. Digital Economy and Finance

The accelerated development of digitalization brings about a fundamental change in the economic and financial system. Digital transaction is becoming part of our lives and serves as the foundation of greater economic efficiency and inclusion. On the other hand, rapid innovation, such as the rise of financial technology and crypto assets, poses new risks to the global financial system. This has led to the need for policymakers to strike the right balance between innovation and risk mitigation. In achieving this goal, the Indonesian Presidency has put forward the agenda of digital transformation, including the area of payment system digitalization and digital financial inclusion as part of our priority agenda.

Therefore, a strong synergy among global policymakers and industries is warranted to harness the benefits of this megatrend, in particular for propelling the momentum for economic recovery. Continuing the success of the 2021 event, the 2022 Indonesia Digital Economy and Finance Festival (FEKDI) aims to provide a platform for implementing various initiatives under the theme of "Advancing Digital Economy and Finance: Synergistic and Inclusive Ecosystem for Accelerated Recovery." This festival will offer the spirit of collaboration and synergy in line with the goal of the G20 under the Indonesian Presidency, focusing on five distinct areas:

※♦ Day 1 - July 11th, 2022

Industry Support for the Development of the National Digital Economy and Finance Initiatives

💢💠 Day 2 - July 12th, 2022

The Implication of Digital Currency and CBDC: Industry Landscape, Financial Stability, and Inclusion Aspect

⋈♦ Day 3 - July 13th, 2022

Digital Payment Innovation to Support Sustainable Economic Growth

☆ Day 4 - July 14th, 2022

Cross-Border Payments Initiatives: Progress of the G20 Roadmap for Enhancing Cross-Border Payments

💢 💠 Day 7 - Gala Seminar, July 17th, 2022

CBDC and Crypto-Assets: Ensuring Coexistence Between Public and Private Money, Regulatory and Supervisory Framework

2. Policy Normalization

The global economic recovery is currently underway albeit slower pace and on asynchronous momentum. As economic activities in Advanced Economies (AEs) have improved faster, AEs begin their policy normalization phase earlier than Emerging Markets (EMs). Given these challenging circumstances, authorities, particularly in EMs, are expected to formulate policy responses to maintain the recovery momentum while managing potential risks from negative global spillover. The formulated policy response should consider the interlinkages between policies, and therefore take into account the interaction between all policy measures. A systematic analytical framework and implementation guidance are needed to formulate a policy mix strategy to achieve stability and growth objectives. The principles of the macroeconomic policy mix are particularly important to be explored and studied further.

The series of seminars under the theme of "Macroeconomic Policy Mix for Stability and Economic Recovery" is in line with one of the Indonesia G20 Presidency's priority agenda — Exit Strategy to Support Recovery, and will draw its focus on three distinct areas:

⋈♦ Day 1 - July 13th, 2022

Central Bank Policy Mix: Integrated Policy Framework, Capital Flow Management, Macroprudential Policy, Macro-Financial Linkages

※♦ Day 2 - July 14th, 2022

Central Bank Policy Mix: Country Experiences, the Role of Payment System, Future Challenges

3. Green, Inclusion, and Sharia Economy

3a. Green

Mitigation and adaptation toward climate change require the mobilization of financial resources. In this regard, sustainable finance becomes a key lever to accommodate green projects and support the transition into a low-carbon economy. While backed by the uprising trend of global investors and stakeholder concern on ESG, there also lies challenges on how to scale up green financing, especially in low-income and developing economies. Despite the challenges, the path to transition toward net-zero is also rich in opportunities. Therefore, stakeholders must work hand-in-hand to create feasible and well-designed sustainable finance and sustainable projects.

The G20 is at the forefront to forge cooperation and foster ambitious climate action. Building on the G20 Sustainable Finance Roadmap, the Indonesia G20 Presidency has put forward sustainable finance as one of the priority agendas to ensure a just and affordable transition for all. The series of related seminars under the theme of "Green Economy and Finance" will draw its focus on four distinct areas:

⋈♦ Day 1 - July 14th, 2022

Sustainable Finance for Climate Transition Roundtable: Private Finance, the Role of Different Financial Institutions, Energy Sector Role in the Transition

※♦ Day 2 - July 15th, 2022

- Scaling Up Green Finance in Indonesia: Green Investment Potentials, Financial Institution Commitment and Strategy, Opportunities in the Low Carbon Industry
- Infrastructure Investors Dialogue:
 Investment Opportunities in Sustainable Infrastructure,
 the Opportunity for G20 Framework on Sustainable Infrastructure

※♦ Day 3 - July 16th, 2022

Breakfast Policy Meeting on Climate Mitigation: High-level Exchange of National Experiences

3b. Inclusion and Sharia Economy

The COVID-19 pandemic has widened inequality, especially for the most vulnerable and underserved groups. Nevertheless, the acceleration of digitalization increases individuals' and MSMEs' access to finance as well as economic opportunities to support economic recovery. However, with rapid digitalization, the risk of financial exclusion remains a challenge. Under the Indonesian G20 Presidency, the agenda of financial inclusion is stressing the importance of digital financial inclusion and SME finance, coherent with the G20 Financial Inclusion Action Plan (FIAP). In addition, the Indonesian G20 Presidency also leverages this opportunity to seek further collaboration on sustainable financial inclusion endowment projects among G20 member countries.

Optimizing Endowment Fund for Sustainable Financial Inclusion (Joint with IsDB)

Digital Finance to Support Financial Inclusion: The Future of Digital Finance, Financial Inclusion for Women and Youth, Consumer Protection in Digital Finance

4. International Taxation

Asian countries' participation in the multilateral efforts for tax transparency is uneven, with a limited number of countries joining the Global Forum and committed to implementing the standard on transparency and exchange of information on request. Regional initiatives, such as Africa and Latin America Initiatives, have demonstrated their efficiency in promoting and advancing the tax transparency agenda locally. They create an invaluable dynamic and bring concrete and measurable progress. An Asia Initiative to promote transparency and exchange of information will contribute to a sustainable post-pandemic recovery and stronger cooperation to address tax evasion and other illicit financial flows. This endeavor is in line with the Indonesia G20 Presidency's priority agenda on international taxation.
