

## RATING ACTION COMMENTARY

### Fitch Affirms Indonesia at 'BBB'; Outlook Stable

Fri 01 Sep, 2023 - 3:46 AM ET

Fitch Ratings - Hong Kong - 01 Sep 2023: Fitch Ratings has affirmed Indonesia's Long-Term Foreign-Currency Issuer Default Rating (IDR) at 'BBB' with a Stable Outlook.

A full list of rating actions is at the end of this rating action commentary.

#### KEY RATING DRIVERS

**Credit Fundamentals:** Indonesia's rating balances a favourable medium-term growth outlook and low government debt/GDP ratio against weak government revenue and lagging structural features, such as governance indicators, compared with 'BBB' category peers. Several external finance metrics, such as its current account, are stronger than pre-pandemic levels, but should normalise to some extent in the next few years, on the assumption that commodity prices will fall further.

**Solid Growth Outlook:** Domestic consumption is holding up well, supporting our forecast of 5.0% real GDP growth for 2023, even though net exports have started to contribute slightly negatively to growth and downside risks are strengthening with the weakening of China's economic rebound. Growth has stabilised at around the pre-pandemic level with outturns of just over 5% for the past seven quarters. We forecast that growth will continue to hover at around this level, at 5.2% in 2024 and 5.0% in 2025.

Economic activity should receive a boost over the medium term from the implementation of reforms from the past few years and continued infrastructure development, including the construction of the new capital, Nusantara, in East Kalimantan. Quarterly growth data suggest that investment has not yet been affected much by uncertainty related to the general elections scheduled in February 2024. Parties' election spending may also support growth in the next six months.

**Inflation Under Control:** Tight monetary policy and coordination to contain rising local food prices have brought inflation back to the mid-point of the 2023 target range (3.0%

+/- 1%), at 3.3% in August 2023, from a peak of 6.0% in September 2022. Dry weather from El Nino is a key risk to our forecasts of 2.7% in 2023 and 3.0% in 2024, as it could affect harvests and prices of food and beverages, which form 25% of the CPI basket. The target will be lowered in 2024 to 2.5% +/- 1%, but we expect Bank Indonesia (BI) to start cutting rates early next year, in the absence of severe depreciation pressure on the rupiah.

**Fiscal Policy to Remain Prudent:** The general government deficit has already returned to pre-pandemic levels in 2022, at 2.4% of GDP, and we expect it to remain broadly stable at that level over the next few years. The upcoming elections could change Indonesia's fiscal policy stance, but this is not our baseline scenario, given the broad political support for the deficit ceiling of 3% of GDP. We expect general government debt to gradually fall to 38.0% of GDP by 2025, from 38.9% in 2023, still well above the 2019 level of 30.6%.

**Revenue Ratio to Fall:** We expect the modest uptick in the 2022 general government revenue ratio, to 15.1% of GDP, to reverse to 14.3% in 2023, well below the 'BBB' category median of 22.1%. The government has taken some steps to enhance revenue such as raising the VAT rate by 1pp in 2022, which should generate additional revenue of 0.3% to 0.4% of GDP this year, but we expect falling commodity prices to have a larger negative impact. The interest/revenue ratio, which we project at 13.9% in 2023, is significantly higher than the 'BBB' category median of 8.5% this year.

**Current Account Turns into Deficit:** The current account balance turned negative in 2Q23 at -0.6% of GDP after seven quarters of surplus, as exports of mining and manufacturing products fell. We expect the deficit to widen gradually to 0.9% in 2024 and 1.5% in 2025, from 0.3% in 2023, as commodity prices decline. However, we view a return to pre-pandemic levels and strong dependence on portfolio flows to finance the deficit as less likely over the next few years. We expect the basic balance surplus (current account + net FDI) of 1.0% of GDP in 2023 to worsen gradually and return to a small deficit in 2025.

**Potentially Stronger External Finances:** We expect FDI to pick up gradually, including in the electric-vehicle sector, as downstreaming activities gather pace, increasing manufacturing exports and adding more value to Indonesia's commodity exports. This could reduce balance-of-payment vulnerabilities over the medium term if these developments structurally lead to higher manufacturing exports and FDI inflows, and lower current account deficits. Indonesia could also stand to gain from multinationals' China+1 strategies, amid competition from other countries to benefit from shifting supply chains.

**Reserve Buffers Used:** Foreign-exchange reserves fell by USD7.5 billion between March and July to USD137.7 billion at end-July 2023, as BI has been intervening to address market volatility and the government reduced issuances in foreign currency. The reserves are equivalent to 5.7 months of current-account payments, above the 4.2-month 'BBB' median, and external debt ratios are improving. However, external liquidity is weaker - as measured by the ratio of liquid external assets to liquid external liabilities - and the country remains more dependent on commodity exports than many peers.

**Less Dependence on Foreign Financing:** 28% of government debt is denominated in foreign currency, down from 38% in 2019 and 44% a decade ago, in part because local-currency government debt jumped due to the pandemic. This reduces the government's exposure to foreign-exchange fluctuations. Foreign investors in government bonds have increased their combined holdings by around USD5 billion year-to-date, after a net outflow of USD16.5 billion over the past three years.

The share of non-resident holdings of local-currency government debt has fallen to 16% of total debt, from 39% in 2019, and is likely to remain closer to the lower level over the next few years due to larger government debt and bond yields remaining high globally. Local banks have increased their holdings by around 10pp to 31% over the same period.

**ESG - Governance:** Indonesia has an ESG Relevance Score (RS) of '5' and '5[+]' respectively for Political Stability and Rights and for the Rule of Law, Institutional and Regulatory Quality and Control of Corruption. These scores reflect the high weight that the World Bank Governance Indicators (WBGI) have in our proprietary Sovereign Rating Model.

Indonesia has a medium WBGI ranking at the 49th percentile, reflecting a recent record of peaceful political transitions, a moderate level of rights for participation in the political process, moderate institutional capacity, established rule of law and a high level of corruption.

## **RATING SENSITIVITIES**

### **Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade**

- External Finances: A sustained decline in foreign-exchange reserve buffers, resulting, for example, from outflows stemming from a deterioration in investor confidence or large foreign-exchange interventions.
- Public Finances: A material increase in the overall public debt burden closer to the level of 'BBB' category peers; for example, resulting from rising fiscal deficits or accumulation of debt by publicly owned entities.

## **Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade**

- Public Finances: A marked improvement in the government revenue ratio in the next few years closer to the level of 'BBB' category peers, including from better tax compliance or a broader tax base, which would strengthen public finance flexibility.
- External Finances: A material reduction in external vulnerabilities, for instance, through a sustained increase in foreign-exchange reserves, a further decline in the dependence on portfolio flows or lower exposure to commodity price volatility.
- Structural: Significant improvement in structural indicators, such as governance standards, closer to those of 'BBB' category peers.

## **SOVEREIGN RATING MODEL (SRM) AND QUALITATIVE OVERLAY (QO)**

Fitch's proprietary SRM assigns Indonesia a score equivalent to a rating of 'BBB' on the Long-Term Foreign-Currency IDR scale.

Fitch's sovereign rating committee did not adjust the output from the SRM to arrive at the final Long-Term Foreign-Currency IDR.

The rating committee decided to remove the +1 notch adjustment used to offset the deterioration in the SRM output driven by the pandemic shock, in particular from the growth volatility variable. The SRM score has returned to its pre-pandemic level, as Indonesia has absorbed the shock without lasting effects on medium-term macroeconomic stability.

Fitch's SRM is the agency's proprietary multiple regression rating model that employs 18 variables based on three-year centred averages, including one year of forecasts, to produce a score equivalent to a Long-Term Foreign-Currency IDR. Fitch's QO is a forward-looking qualitative framework designed to allow for adjustment to the SRM output to assign the final rating, reflecting factors within our criteria that are not fully quantifiable and/or not fully reflected in the SRM.

## **COUNTRY CEILING**

The Country Ceiling for Indonesia is 'BBB', in line with the Long-Term Foreign-Currency IDR. This reflects the absence of material constraints and incentives, relative to the IDR, against capital or exchange controls being imposed that would prevent or significantly impede the private sector from converting local currency into foreign currency and transferring the proceeds to non-resident creditors to service debt payments.

Fitch's Country Ceiling Model produced a starting point uplift of 0 notch above the IDR. Fitch's rating committee did not apply a qualitative adjustment to the model result.

## **BEST/WORST CASE RATING SCENARIO**

International scale credit ratings of Sovereigns, Public Finance and Infrastructure issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of three notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

## **REFERENCES FOR SUBSTANTIALLY MATERIAL SOURCE CITED AS KEY DRIVER OF RATING**

The principal sources of information used in the analysis are described in the Applicable Criteria.

## **ESG CONSIDERATIONS**

Indonesia has an ESG Relevance Score of '5' for Political Stability and Rights as WBGs have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and a key rating driver with a high weight. As Indonesia has a percentile rank below 50 for the respective Governance Indicator, this has a negative impact on the credit profile.

Indonesia has an ESG Relevance Score of '5[+]' for Rule of Law, Institutional & Regulatory Quality and Control of Corruption as WBGs have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and are a key rating driver with a high weight. As Indonesia has a percentile rank above 50 for the respective Governance Indicators, this has a positive impact on the credit profile.

Indonesia has an ESG Relevance Score of '4[+]' for Human Rights and Political Freedoms as the Voice and Accountability pillar of the WBGs is relevant to the rating and a rating driver. As Indonesia has a percentile rank above 50 for the respective Governance Indicator, this has a positive impact on the credit profile.

Indonesia has an ESG Relevance Score of '4' for Creditor Rights as willingness to service and repay debt is relevant to the rating and is a rating driver for Indonesia, as for all

sovereigns. As Indonesia has a fairly recent restructuring of public debt in 2005, this has a negative impact on the credit profile.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit [www.fitchratings.com/topics/esg/products#esg-relevance-scores](http://www.fitchratings.com/topics/esg/products#esg-relevance-scores)

<https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. ESMA and the FCA are required to publish historical default rates in a central repository in accordance with Articles 11(2) of Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 and The Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019 respectively.

Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall,

compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by

Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001. Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the “NRSRO”). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the “non-NRSROs”) and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

dv01, a Fitch Solutions company, and an affiliate of Fitch Ratings, may from time to time serve as loan data agent on certain structured finance transactions rated by Fitch Ratings.

## **SOLICITATION STATUS**

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

## **ENDORSEMENT POLICY**

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be.

Fitch's approach to endorsement in the EU and the UK can be found on Fitch's [Regulatory Affairs](#) page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
